Summary

Full Stack Developer with experience in building robust web applications using TypeScript, JavaScript, and Python. Proficient in designing and integrating RESTful APIs, maintaining efficient database schemas with PostgreSQL and MongoDB, and deploying applications on AWS with CI/CD pipelines. Skilled in NextJs FastAPI, and Django, with expertise in unit and integration testing to ensure application reliability. Experienced in integrating Large Language Models (LLMs) and developing scalable and secure solutions in Agile environments.

Technical Skills

Programming Languages: JavaScript, TypeScript, Python, SQL, Go

Frameworks & Technologies: NextJs, FastAPI(uv), Redux, Zod, Django REST Framework, Node.js, WebSockets, PostgreSQL, MySQL, Puppeteer, Playwright, MongoDB

Tools & Infra: AWS (EC2, Lambda, ECS, RDS, SageMaker), Docker, Git, K8s, CI/CD Pipelines, CodeBerg, Firebase

Testing & Security: Unit Testing, Integration Testing

Experience

Software Engineer, Auditcity (Remote)

June 2024 – July 2025

- **Shipped** lateral.com, a web scraping and API platform using **Next.js**, **Go**, and **Python**, integrating **RESTful APIs** for scalable data extraction.
- **Designed** and Scaled **PostgreSQL** database by **12%** for efficient data storage and retrieval, ensuring seamless end-to-end functionality.
- Deployed applications to **AWS EC2** using CI/CD pipelines, optimizing performance and scalability with **Docker** and terraform containers.
- **Implemented** comprehensive unit and integration tests to ensure application reliability and adherence to **OWASP** security guidelines.
- Collaborated with clients in an **Agile** environment to align solutions with business objectives while maintaining clean and documented code.

Associate Full Stack Engineer – SiliconTech Nepal

June 2023 – June 2024

- **Shipped** responsive web applications with React.js and Node.js, integrating RESTful APIs using FastAPI and MongoDB for efficient data management.
- Designed database schemas in MongoDB and PostgreSQL, optimizing queries for performance.
- Implemented unit and integration tests to ensure application stability and conducted debugging for high-quality deliverables.
- Streamlined development workflows with Docker and AWS (RDS), enhancing deployment efficiency through CI/CD practices.

Projects

Lateral – Web Scraping and API Platform

Live Demo

- Developed a scalable web scraping platform using React.js, Next.js, and FastAPI, with Go-based scrapers for efficient data pipelines.
- Integrated an AI agent with LLMs for real-time news aggregation, featuring a customizable API Playground for user-driven data extraction.
- Designed RESTful APIs with Node.js and MongoDB, ensuring secure and scalable data handling.
- Deployed on AWS with Docker, implementing unit and integration tests for performance optimization.

Hugo Assist – AI Business Strategy & Automation Platform

Live Demo

- Built the core AI agent from scratch that understands business context, analyzes markets, and generates structured strategies for founders.
- Fine-tuned an open-source language model to power the core AI engine, improving strategic relevance and consistency by **35%** over base models.
- Designed automated workflows that convert raw founder inputs into market analysis, problem breakdowns, and execution-ready plans with minimal manual intervention.
- Automated repetitive business planning tasks (idea validation, competitor analysis, positioning drafts), reducing founder planning time by **20%**.
- Integrated Miro Board automation to translate AI outputs directly into visual canvases, roadmaps, and strategy boards without manual setup.
- Extended the AI system for automated marketing use cases, including messaging, positioning, and go-to-market strategy generation.
- Focused on production reliability, observability, and real user feedback rather than experimental demos.

ISBN Book Search Website

Live Demo GitHub

- Built a web application for ISBN-based book searches using React.js for the front-end and Django for the back-end.
- Designed efficient PostgreSQL database schemas for robust data storage and retrieval.
- Orchestrated the whole application with the Docker and CI/CD pipelines, maintaining clean code with Git version control.
- Deployed on Render.

AI Content Editor – Web Application

Live Demo

- Developed an AI-powered content creation platform using Next.js and FastAPI, integrating LLMs for enhanced functionality.
- Designed a WYSIWYG editor with MongoDB for user data and Redis for chat history, ensuring efficient data management.

Certifications

- AI Fundamentals, DataCamp, 2025

Education

BS in Computing with AI, Islington College

Expected 2026
